Sunset is the time of day when our sky meets the outer space solar winds. *There are blue, pink, and purple swirls, spinning and twisting, like clouds of balloons caught in a whirlwind.* The sun moves **slowly** to hide behind the line of horizon, **while the moon races to take its place in prominence atop the night sky.** People slow to a ~~crawl~~, entranced, fully forgetting the deeds that must still be done. There is ^{coolness}, ^{calmness}, when the sun does set.

Oceans and lakes have much in common, but they are also quite different. Both are bodies of water, but oceans are very large bodies of salt water, while lakes are much smaller bodies of fresh water. “Lakes are usually surrounded by land, while oceans are what surround continents.” Both have plants and animals living in them. The ocean is home to the largest animals on the planet, whereas lakes support much smaller forms of life. When it is time for a vacation, both will make a great place to visit and enjoy.
